

Important Risk Warning

- The mention of any investment product should not be construed as representing a recommendation to buy or sell that product, nor does it represent a forecast on future performance of the product.
- Unit Trusts are investment products and some may involve derivatives. The value of investments and units may go down and up, and the investor may not get back the original sum invested. Past performance is not necessarily indicative of future performance. In a worst case scenario, the value of the fund may worth substantially less than the original amount you have invested (and in an extreme case could be worth nothing).
- Investors and potential investors must not solely rely on the content in this website to make investment decisions and should read carefully and understand the offering documents (including the prospectus and full text of the risk factors stated therein), available at HSBC branches and at the fundhouses' webpages, before investing.
- Before you make any investment decision, you may wish to consult a financial adviser. In the event that you choose not to seek advice from a financial adviser, you should carefully consider whether the investment product is suitable for you.

HSBC Risk Level: 3

Investment Objective

The investment policy is geared towards generating long term capital appreciation and income. As a long-term objective, the Sub-Fund's fund management seeks a risk profile of the net asset value per share of the Sub-Fund that experience has shown should be comparable with the risk profile of a portfolio consisting of Equities, High Yields and Convertibles. The Sub-Fund seeks to achieve its objective by investing primarily in a combination of common stocks and other equity securities, debt securities and convertible securities. The allocation of the Sub-Fund's investments across asset classes will vary substantially from time to time. The Sub-Fund's investments in each asset class are based upon the Investment Managers' assessment of economic conditions and market factors, including equity price levels, interest rate levels and their anticipated direction.

Investment Strategy

HSBC investment category: Multi Asset / Balanced
 Investment style: Multi Asset / Balanced
 Interest rate sensitivity: Low
 Investment instrument: Stock, Bond, Cash, Other

Yield And Credit Information

(as of 30-09-2020)

Average current yield:	4.39%		
Average yield to maturity:	2.48%		
Average duration:	3.23 years		
Average credit quality:	B		
Credit quality breakdown			
AAA	0.00%	BB	26.78%
AA	0.08%	B	21.49%
A	5.96%	Below B	2.66%
BBB	8.38%	Not Rated	34.66%

Current yield refers to the annual interest of the bonds divided by the market price of a bond. Yield to maturity is the rate of return anticipated on a bond if it is held until the maturity date, assumed that all coupons are reinvested at the same rate. Duration is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Credit quality is based on Standard and Poor's classification.
