

Important Risk Warning

- The mention of any investment product should not be construed as representing a recommendation to buy or sell that product, nor does it represent a forecast on future performance of the product.
- Unit Trusts are investment products and some may involve derivatives. The value of investments and units may go down and up, and the investor may not get back the original sum invested. Past performance is not necessarily indicative of future performance. In a worst case scenario, the value of the fund may worth substantially less than the original amount you have invested (and in an extreme case could be worth nothing).
- Investors and potential investors must not solely rely on the content in this website to make investment decisions and should read carefully and understand the offering documents (including the prospectus and full text of the risk factors stated therein), available at HSBC branches and at the fundhouses' webpages, before investing.
- Before you make any investment decision, you may wish to consult a financial adviser. In the event that you choose not to seek advice from a financial adviser, you should carefully consider whether the investment product is suitable for you.

HSBC Risk Level: 1

Investment Objective

The sub-fund aims to provide short term total return by investing in bonds and money market instruments, while promoting ESG characteristics within the meaning of Article 8 of SFDR. The sub-fund aims to do this with a higher ESG rating than the Barclays 1-3 Year US (the "Reference Benchmark"), calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the Reference Benchmark constituents. In normal market conditions, the average duration of the portfolio holdings of the Sub-Fund is not expected to exceed one year, which is considered to be "ultra short" duration. The sub-fund invests in normal market conditions a minimum of 70% of its net assets in either fixed or floating-rate income and other similar securities including money market instruments which are rated Investment Grade.
